ABOUT THE CONSORTIUM

The Alberta RWE Consortium engages key stakeholders in RWE generation and utilization in order to advance capabilities, ensure high quality projects are managed to timelines and budget, and (where capacity is limited) help focus projects and resources on priority issues.

FACILITATING THE GENERATION OF ROBUST REAL WORLD EVIDENCE

CONSORTIUM MEMBERSHIP

The Universities of Alberta and Calgary, along with the Institute of Health Economics, have led the formation of the Alberta RWE Consortium. Consortium membership also includes Alberta Innovates, Alberta Health, Alberta Economic Development and Trade, and Alberta Health Services.
Real World Evidence (RWE) studies investigate the impact of an intervention or technology on health outcomes and resource utilization outside a controlled clinical trial setting.

The Alberta RWE Consortium:
- Engages key stakeholders to provide guidance and improve the value of RWE studies
- Convenes the best pan-provincial teams
- Provides world-class project support, including study design, execution, and knowledge-sharing

The Alberta RWE Consortium facilitates basic to highly complex RWE studies, generating a wide range of evidence, including incidence and prevalence of disease in specific populations, treatment patterns including sequencing, adherence, and persistence, safety monitoring, as well as comparative effectiveness and cost-effectiveness.

Alberta has one of the largest, most mature, detailed and comprehensive health system data depositories in Canada. It also has distinct advantages that make the province attractive to life sciences-related activity, including:
- A single health authority and the largest fully integrated health system in Canada
- Strategic Clinical Networks to drive innovation and its implementation across the health system
- Advanced and comprehensive health information systems and database assets
- World leading clinical, methodological and analytic expertise
